1. INTRODUCTION

Metsimaholo Local Municipality (MLM) is one of the four local municipalities located within the Fezile Dabi District. The municipality was established following the local government elections of 2000 in terms of the section 12 of the Municipal Structures Act (MSA), 1998. The municipality was formed following the amalgamation of four erstwhile municipalities of Sasolburg, Deneysville, Oranjeville and Vaal Dam. Sasolburg serves as a home for the headquarters of the municipality.

This serves as the Service Delivery and Budget Implementation Plan (SDBIP) of MLM for the 2020/2021 financial year. The SDBIP was prepared in line with the approved MTREF and Reviewed IDP as well as the applicable legislative requirements of the MFMA. The SDBIP therefore contains information in regard to revenue and expenditure projections, service delivery targets and indicators and provides a detailed breakdown of the municipality's approved capital budget per ward.

The SDBIP is an important oversight and management tool which must be informed by the approved IDP and Budget. The SDBIP in turn has to inform the annual performance agreements/plans of the Municipal Manager and Directors. To further ensure alignment with the municipality's Performance Management System (PMS) it is critical that in-year reporting (monthly, quarterly and mid-year), and annual reporting are done against the targets set in the approved SDBIP.

As per National Treasury Guidelines, The SDBIP is made up of three parts plus the Technical Description Indicators

The different parts are as follows:

Part One (General Information) of the SDBIP contains information relating to the municipality's vision, mission, values, strategic priorities, KPAs and programmes as well as the legal and management context of the SDBIP.

Part Two (Financial Information) includes the financial information in respect of the operating revenue and expenditure, capital expenditure monthly projects in line with the approved cash flow budget, breakdown of the capital budget per municipal KPA and ward and further includes a reconciliation of the approved IDP and Budget.

Part Three (Performance Information) provides details on the municipality's quarterly service delivery targets and performance information,

Part Four (Technical Description Indicators): It includes details of complete technical indicators for the Strategic Oriented Outcome Goals as contained in the IDP.

The purpose of the SDBIP is to effectively ensure the alignment between the IDP, Budget and PMS and the oversight and management mechanisms of the municipality. The Executive Mayor and Municipal Manager bear overall responsibility to ensure that the SDBIP is effectively monitored during the course of the financial year. Quarterly performance review sessions will be convened between the Executive Mayor and the Municipal Manager and between the Municipal Manager and the Directors (including the panel as stipulated in the regulations) after the end of each quarter to do an in -depth assessment of actual performance, the reasons for under- or non-performance and whether appropriate corrective measures are being taken to address any performance issues.

4. WHAT IS THE SDBIP?

The SDBIP is a document that seeks to translate the strategic objectives and goals in the IDP and the budget estimates in the Budget into concrete annual plan with clear plans, key performance indicators, targets and budgets in terms of which performance of the municipality would be monitored and evaluated throughout the financial year.

In specific terms Section 1 of the MFMA defines the SDBIP is defines as follows:

"a detailed plan approved by the mayor of a municipality in terms of section 53(1)(c)(ii) for implementing the municipality's delivery of services and the execution of its annual budget and which must include the following:

(a) projections for each month of:

i. revenue to be collected by source; and ii. operational and capital expenditure, by vote;

(b) service delivery targets and performance indicators for each quarter

(c) Any other matters that may be prescribed, and includes any revisions of such plan by the mayor in terms of section 54(1)(c)"

The Service Delivery and Budget Implementation Plan (SDBIP) is compiled in terms of the Municipal Finance Management Act (MFMA) guidelines (Circular 13) and gives effect to the Municipality's Integrated Development Plan (IDP) and annual budget. These are two components integral to the implementation and entrenchment of our performance management framework. The SDBIP facilitates accountability and transparency of the municipal administration and managers to the Council. It also fosters the management, implementation and monitoring of the budget, the performance of top management and the achievement of the strategic objectives as laid out in the IDP.

The SDBIP enables the Municipal Manager to monitor the performance of Senior Managers, the Mayor to monitor the performance of the Municipal Manager and for the community to monitor the performance of the municipality as each activity contains outputs, outcomes and timeframes. The SDBIP is compiled on an annual basis and includes a 3 year capital budget programme.

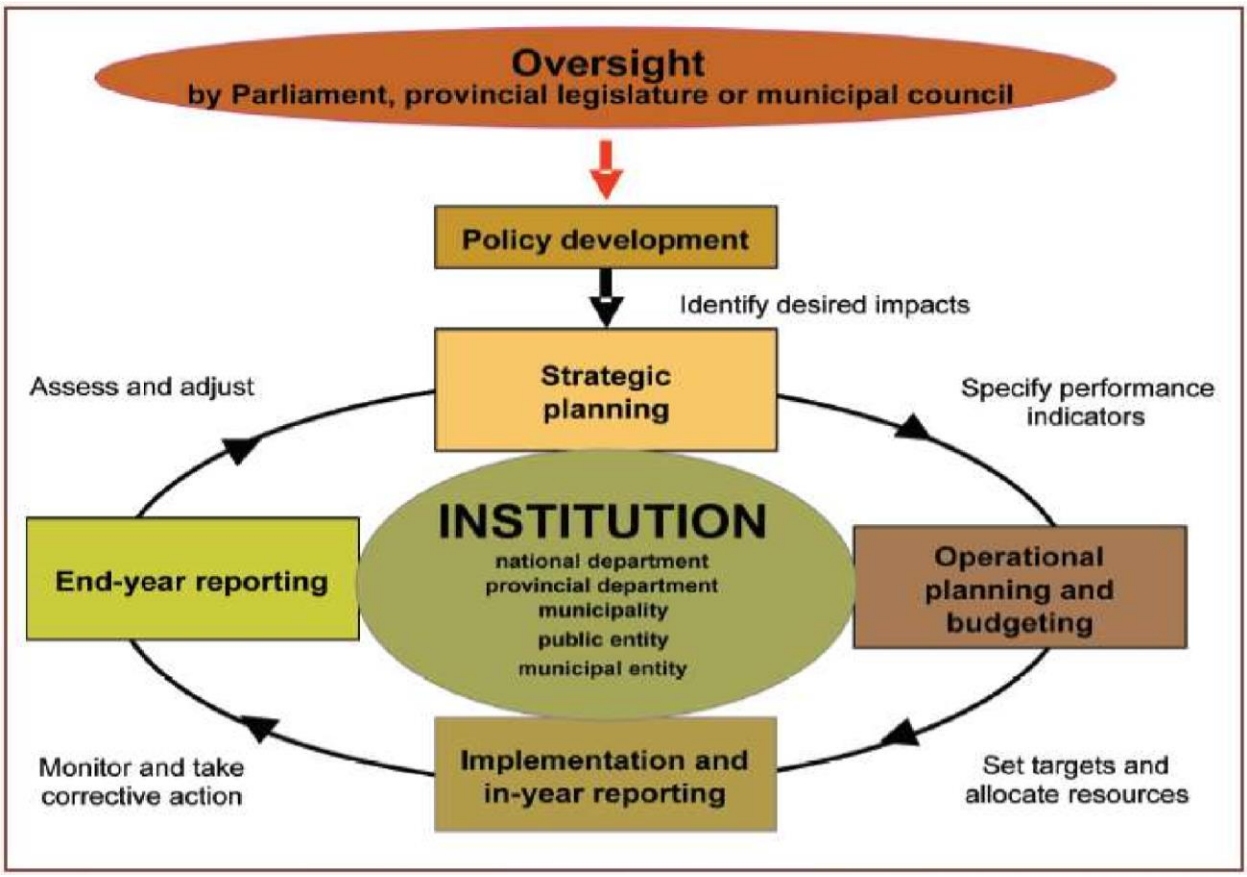
The SDBIP is yet another step forward aimed at pumping life into the principle of democratic and accountable (local) government as enshrined in Section 152 (a) of the Constitution. In terms of the provisions of the aforesaid Act and accompanying circulars and regulations, the processes for the submission, approval, implementation and revision of the SDBIP are governed by the following sections of the Act:

- Section 69 (3) (a)
- Section 53 (1) (c) (ii) and (iii)
- Section 53 (3((a) and (b)
- Section 71 (1) (g) (ii)
- Section 72
- Section 54

5. FRAMEWORK FOR THE SDBIP

The SDBIP is part of the broader planning framework across government. It constitutes an operational planning component in local government as part of local planning framework

located with within the broader planning framework of government. The diagram below locates the SDBIP within the framework.



The SDBIP is a vital component of the performance management system. It basically represents a fusion of IDP and PMS in that it concretizes the relationship between plans in the IDP, indicators in the PMS Framework and the estimates in the budget into an annual plan with measurable targets for monitoring and evaluation.

The performance of the municipality relates directly to the extent to which it has achieved success in realising its goals and objectives, complied with legislative requirements and meeting stakeholder expectations. The municipality therefore has adopted one integrated performance management system (framework) which encompasses:

- Planning (setting goals, objectives, targets and benchmarks);
- Monitoring (regular monitoring and checking on the progress against plan);
- Measurement (indicators of success);

- Review (identifying areas requiring change and improvement);
- Reporting (what information, to whom, from whom, how often and for what purpose);
- Improvement (making changes where necessary).

The performance information concepts used by the Municipality in its integrated performance management system are aligned to the ***Framework of Managing Programme Performance Information*** issued by the National Treasury as illustrated below:

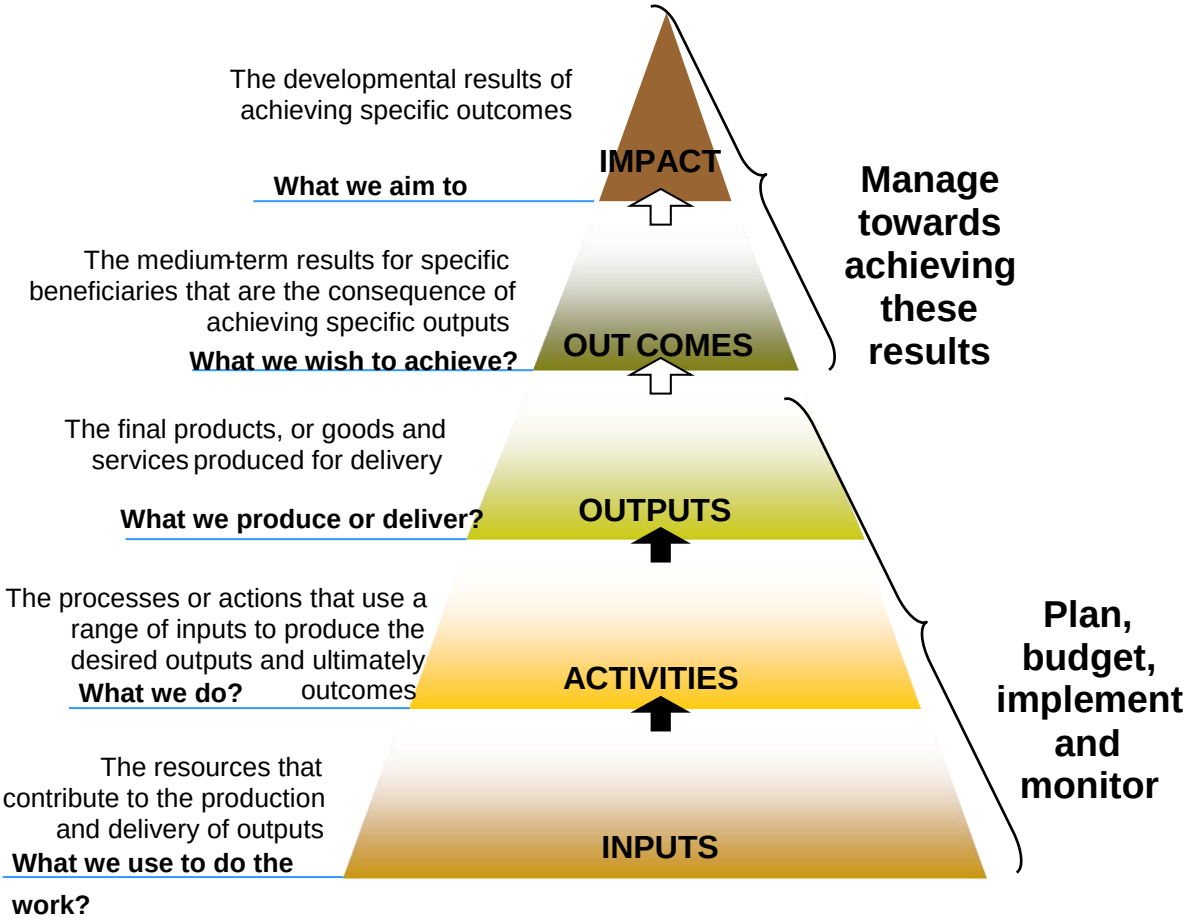


FIGURE 1 DEFINITION OF PERFORMANCE INFORMATION CONCEPTS

6. MONITORING, REPORTING AND REVISION

Monthly reports will be submitted by the Directors to the Municipal Manager and by the Municipal Manager to the Executive Mayor in terms of section 71(g)(ii) of the MFMA. Monthly reports will also be submitted to Clusters for review and assessment.

Quarterly reports will be submitted by the Executive Mayor (Mayoral Committee) to Council in terms of section 52(d) of the MFMA indicating progress being made with the implementation of the SDBIP.

It should also be noted that in terms of section 54(1)(c) any revisions to the SDBIP service delivery targets and performance indicators may only be made with the approval of the Council following approval of an adjustments budget.

It is also required in terms of section 121 that the Annual Report of the municipality must include an assessment of performance against measurable objectives and the approved SDBIP.

- **Monthly** reports must be submitted by the MM to the Executive Mayor (s71 of MFMA)
- **Quarterly** reports must be submitted by the Executive Mayor to Council (s52 of MFMA)
- **Mid-year** budget and performance assessment report must be submitted by the MM to the Executive Mayor (s72 of MFMA)

Revision:

- Any revisions to the SDBIP service delivery targets and performance indicators may only be made with the approval of the Council following approval of an adjustments budget (s54 of MFMA)

Annual Report:

- The Annual Report of the municipality must include an assessment of performance against measurable objectives and the approved SDBIP (s121 of MFMA)

ANNEXURE A: Technical Indicators Description for the IDP Strategic Outcomes Oriented Goals

1. Introduction

The technical indicator description is one of the requirements to support the annual performance plans of public institutions in terms of the Framework for Strategic Plans and Annual Performance Plan of 2010 as published by the National Treasury. In terms of the framework, both the outcome and performance indicators must be assigned technical indicators. This document therefore serves exactly this purpose and further recognises the strategic alignment that must exist between various planning concepts and models in local government as outlined above.

Both the outcome and performance indicators must be assigned technical indicators. Below are the details of complete technical indicators for the Strategic Oriented Outcome Goals as contained in the IDP.

The table below provides an explanation of the technical indicator protocol used to describe technical indicators in this document.
