UPDATE: ELECTRICITY OUTAGE IN DENEYSVILLE

We regret to announce that a malfunction in the Hoff mini substation has caused a power outage affecting multiple streets in Deneysville, including Hoff Street, Pleen Street, Johnson Street, Van der Merwe Street, and Main Street.

Our Electrical Department is actively working to address the issue. To expedite the restoration process, we have appointed a specialized service provider who is already on site and has commenced the installation of a new mini substation on Hoff Street.

We sincerely apologize for the inconvenience this outage may cause. We appreciate your patience and understanding as we work tirelessly to restore power to the affected areas as soon as possible.

Thank you for being so cooperative during this time.
