PLANNED ELECTRICITY OUTAGES FOR ESSENTIAL MAINTENANCE – VAALPARK AND SASOLBURG

Metsimaholo Local Municipality wishes to inform all residents of Vaalpark and Sasolburg of scheduled electricity outages required to carry out critical maintenance on our electrical infrastructure. This work is essential to ensure a reliable, safe, and efficient power supply to our communities. **The maintenance will take place at the Sasolburg Main Substation on 25–26 August 2025 from 08:00 to 16:00, and at the Vaalpark Main Substation on 27–28 August 2025 from 08:00 to 16:00.** During these periods, affected areas may experience temporary power outages. Our technical teams will work diligently to complete the maintenance as quickly and safely as possible, to restore power promptly each day. Residents are encouraged to prepare in advance by unplugging sensitive electrical appliances to protect them from possible power surges, ensuring alternative lighting such as fully charged torches or lamps, keeping mobile devices charged, and planning for meals, refrigeration, and any business operations that may be affected.

We sincerely apologize for any inconvenience these outages may cause and thank all residents for their patience and cooperation as we work to maintain and improve our electricity supply.
