Unplanned Electricity Outage in Sasolburg – Urgent Repair Work Underway

Metsimaholo Local Municipality wishes to inform the residents of Sasolburg, particularly those residing in the areas around OK Grocery and Parklands Flats, of an electricity outage that has affected your supply. The outage is due to a faulty Low Tension (L.T) panel at the Eric Louw Substation, malfunctioning following load shedding. We sincerely apologize for the inconvenience this has caused.

Our Electrical Department responded promptly and worked through the night of **13 May 2025** to restore electricity. Unfortunately, the repairs could not be completed as planned due to unforeseen technical complications. We understand the frustration and inconvenience this may cause and assure residents that repair work will resume **this morning, 14 May 2025**, and will continue until the issue is fully resolved and the electricity supply is restored to the affected areas.

We are committed to keeping you informed and will provide timely updates on the progress through our Facebook Page. Metsimaholo Local Municipality appreciates your patience, understanding, and cooperation during this period.
