

PUBLIC NOTICE

22 July 2025

URGENT UPDATE ON PLANNED ELECTRICAL OUTAGES IN SASOLBURG AND VAALPARK

Metsimaholo Local Municipality hereby informs residents of Sasolburg and Vaalpark that the previously scheduled emergency maintenance on key substations has been **postponed until further notice** due to unforeseen technical circumstances. This postponement affects the Sasolburg Main Substation (originally scheduled for **Monday, 22 July 2025**), **the Voster Substation (Tuesday, 23 July 2025)**, **the Vaalpark Substation (Wednesday, 24 July 2025)**, and **the Sasolburg Eskom Substation (Thursday, 25 July 2025)**. Residents should take note that the scope of the planned maintenance may be revised, which could result in a reduction in both the number of substations affected and the overall duration of any future outages.

Residents are reminded to always treat all electrical appliances as live to prevent damage or injury, even though the scheduled outages are currently on hold. This is a precautionary safety measure that remains essential. Metsimaholo Local Municipality's Electrical Department extends its sincere apologies for any inconvenience caused by this change and appreciates the public's understanding and cooperation. Further updates, including revised schedules, will be communicated as soon as they become available.
